Matt

I have requested them to review the responses to their comments and let me know if it has been addressed adequately. I have requested them to get back to me by this Friday or latest by Monday. I will send you a response latest by Tuesday.

Just something for you all to keep in mind – if the comments are adequately addressed and no additional significant comments then I will respond as such and you can finalize. If however, there is something significant that needs to be addressed further, we may need to mutually agree to extend the deadline of Dec 29<sup>th</sup> (I spoke to Ed Quinones about this and he said that once you and I agree on a date all I would need to send you all a letter of the new date).

**Subject:** USOR RI/FS Work Plans - Response to Comments

Raji, et al:

Attached is the response to comment document prepared by the USOR PRP Group. We used the original comment document prepared by Raji as a go-by, and added our response to the right-hand side of the document. We numbered the comments for easier reference.

I am going to send three additional emails, one for each of the three work plans (RI/FS Work Plan, FSP, QAPP). Each email will contain the text for that plan in redline-strikeout plus any table or figure that was revised per EPA/TCEQ comments. This will result in four separate emails but I thought that would be less confusing than sending everything in one email and having people sort it out.

During the review, we caught a few typos and inconsistencies between the plans but other than that the only changes made were in response to the EPA/TCEQ comments. Please note also that there are some formatting (pagination) issues from adding or revising text. I will clean those up when we are ready for final documents. I've not updated the table of contents yet either.

We hope that the proposed changes will be acceptable to EPA and TCEQ and that we can finalize these documents soon.

Regards,

Matt
